Mixed Materials COLLECTION

Feel free to mix it up.

**MIXED MATERIALS** brings breakthrough innovation to the collaborative environment, allowing designers to use hard and soft flooring surfaces side-by-side, alone or in multiple combinations to create spaces that support the way we work, learn and interact. With Mixed Materials, you can break-free from transition strips and complicated installations with a collection that allows modular carpet and resilient to be mixed without interference, right out of the box.

# Mixed Materials COLLECTION

## Shape it up.

Designed specifically for multi-faceted, high-demand spaces, Mixed Materials introduces a Facet shape, based on a rhombus. The shape provides additional freedom, allowing designers to mix the collection with many of our existing products. Mixed Materials lets you design a mix of spaces where people are free to move, collaborate, concentrate and interact without sacrificing design or performance.
